Chroma is your choice of interface system for the Microsoft Windows operating system. You can add it to Microsoft Explorer, Microsoft Word, Microsoft Powerpoint, and more! In addition to injecting your own interface system into Windows, you can have unlimited mouse-overs and animation for enhanced and intuitive control. Install Chroma in three simple steps: 1. Install Microsoft Windows. 2. Install Chrome. 3. Restart your computer. Chroma is currently in BETA and bugs are expected. UPDATE 23/20/12: - Added more support for the Window's Custom theme UPDATE 24/20/12: - Fixed: didn't work on XP because of the folder redirection UPDATE 22/11/13: - Fixed: the mouse redirection after restarting UPDATE 23/11/13: - Fixed: no longer able to use right click for a nice look. UPDATE 23/11/13: - Fixed: The installer looks better, darker and more consistent for all themes, UPDATE 21/11/13: - Added: More Common Sense. If the custom theme is not enabled when you start the app, you will be warned and asked to activate it. UPDATE 15/11/13: - Updated: smaller file size for a better download. UPDATE 26/10/13: - Improved Code Documentation: Added : An Introduction to Chroma how it works. - Fixed: Usability issues with Windows 8 Metro. UPDATE 13/06/13: - Added: Improvements to the Control/Mouse Over animation. - Fixed: Control/Mouse Over animation didn't work correctly - Fixed: Errors when trying to uninstall from an older version. - Fixed: Many other small bugs found by beta testers. Terminal Emulator Terminal Emulator Description Looking for a simpler way of using SSH connections in Windows? Check out Terminal Emulator, which adds a lot of useful features to the OpenSSH file transfer protocol. Install Terminal Emulator in five easy steps: 1. Install OpenSSH (Not required) 2. Install Terminal Emulator 3. Restart your computer. 4. Go to Start | Programs | Terminal Emulator and enjoy! Chroma Description: Windows has an OpenSSH terminal emulator which automatically transports you to Linux environments, through SSH enabling you to access your files and folders through commands. This is the

- Mouse over your icons to see a menu of customizations - Customize the look and feel of your desktop, icons and windows - Colour the actions around you with mouse-overs and with realistic human appearance - You can also make your windows have a different colour, and use that to set a visual theme for your system - Customize the colour of your favourite folders, your speakers, and everything else - Works with the Appearance preferences - Works with all Windows systems Samples: • Customize your desktop and icons to taste • Put a fun or serious expression in your windows and folders • Create a wide variety of window themes that can be plugged into the system • Get control of the icons, tasks and windows that Windows normally controls • You can enhance your system with cooler colours, customisable dictionaries, transparency, shadows, and transparency • With mouse-overs you can change nearly anything in Windows Some people don't want a whole new operating system. We tend to assume that just because a program is available for Windows, it will work on Mac as well. However, one of the most frustrating things about Mac is that Mac software typically doesn't have Windows versions. Thankfully that's no longer true. The Windows version of Dabblers is now available for download! What are you waiting for? Get it here: Important note: This is an unofficial 64-bit version of Dabblers. Neither myself nor Deacysoft are responsible for the quality or safety of this product. For more information, please read our Web Site Warnings (Are you having trouble with your Microsoft Word? Is Microsoft Word crashing all the time? Are you looking to maximize your Word usage? This app can help you with all your Word problems. What does it do? This app checks your Computer's Disk Space, makes sure that your documents can fit in your disk space and will alert you if it's a problem. You can also put your documents to a flash memory card or other removable disk so that your documents can be saved. Installation 1. Click the installer and follow the instructions. 2. You may get a message that it cannot be opened because it is not signed. 3. Click "Open" on that message 09e8f5149f

Chroma is built to work, and work well, with your existing Windows applications and is a quality replacement for the Windows desktop. Chroma is an open, extensible design, allowing any application developer to add support for a wide variety of actions. To use it, you need a recent version of the Microsoft.NET Framework, and you can download it here: Installation: Chroma is a standalone.EXE Windows application, so there is no installation required to use it. To use it, all you need is an Internet connection to set up your Chroma account, and then enjoy an easier, faster and more beautiful desktop experience. If you need assistance in setting up your Chroma account, send an email to support@chromamobile.com. If you're new to Chroma, be sure to check out the tutorial on our home page: Limitations: • You must be running Windows XP or Windows Vista to use Chroma. • If you access Chroma on a touchscreen device, you can run it in 50% transparency, and use the touchscreen interface with only the left hand. • Only the HP Compaq 6715b scanner is supported. If you have any questions, send an email to: support@chromamobile.com Chroma installation instructions: 1. Run the Chroma.exe program, and choose the language you prefer, by clicking the 'Show Language...' button, and then choosing the language of your preference. 2. Click the 'Check for Updates' button in the About dialog to update the software. 3. Click the 'Enjoy!' button to download the latest program update. 4. Open the EZ Grab™ Grabbers from Programs menu. 5. Click the New EZ Grab™ Grabber button and choose the printer that you prefer from the list. 6. Select the option you prefer from the Grabbed Files window: a. 'Install as an Active X Control' allows you to quickly install the Grabber to your desktop. b. 'Create Desktop Shortcut' attaches the Grabber to your desktop, and you can access it easily. c. 'Create Save File' saves the Grabber as a.EXE for later

What's New in the?

Chroma is a utility for installing and supporting Chromium (the new open source Chrome engine) extensions on Microsoft Windows. It's based on Chromium's Chrome Web Store and, as such, allows you to install all the extensions developed specifically for Google Chrome. Chroma installs the extensions on your computer and lets you manage them with the Magic Wand. There is no way to save or uninstall extensions from within Chroma. You don't need to have Chrome installed to use Chroma. It works with Microsoft Internet Explorer 9 and higher, which means that you can also install Chroma on PCs that don't support Chrome. This release is a semi-rolling release, meaning that new versions of Chroma are released only after new versions of Chromium. Install / Uninstall Chroma isn't installed as a standalone program. Instead, it's accessible from Chrome's Add-ons menu, either from the Extensions tab or by selecting Extensions > Install from other extensions. Clicking on this link takes you to a page where you can search for Chroma's alternative links (directly from Google or through reseller versions), or you can use the Magic Wand to install or uninstall extensions. Once an extension is installed, it's automatically started and accessible from the Extensions menu. Manage To access your extensions, simply type Chroma in the Start menu or search for it in the Start menu. From the Extensions menu, you can perform the following actions:  Access installed extensions and manage their permissions.  Remove an extension.  Remove or replace a theme.  Change the base theme.  View all installed extensions.  Add or remove any extension (allowing you to quickly switch to a theme that supports the extension in question). As an alternative, you can right-click on the extension's thumbnail to access the extension's options. You also have the option to remove all extensions from your Windows desktop.  Select an option. Highlight an extension. Click the Remove button to remove the selected extension. Click the Uninstall button to remove all extensions. Click the Back button to return to the Extensions page. Click the Close button to return to the Options page. Click the X button on the toolbar to exit the Options page. Click the X button to exit

System Requirements For Chroma:

Windows 7, Vista, XP Mac OS 10.5.7 or newer Mac OS 10.6.6 or newer Mac OS 10.7.2 or newer Mac OS 10.8 or newer Windows requires 64-bit Windows 7, Vista, XP, etc. Mac requires 64-bit Mac OS 10.5.7 or newer Mac requires 64-bit Mac OS 10.6.6 or newer Mac requires 64-bit Mac OS 10.7.2 or newer Mac requires 64-bit Mac OS 10.
