WatchTheClock Crack+ Activator [Updated]

WatchTheClock is a small clock and time management application able to time your activities with the aid of a stopwatch and countdown timer. It can be deployed on Windows XP, Vista, 7, and 8. Why opt for portable utilities WatchTheClock is portable and brings several benefits to your system. Double-clicking on the executable file is sufficient for gaining access to the program's interface because you do not have to follow the steps included in an installation process. What's more, you can drop it on pen drives to have it with you all the time. Since it does not leave entries in your Windows registry and other configuration files in your system, you can uninstall it via a deletion task. Clean looks WatchTheClock sports a straightforward GUI that allows you to set up the dedicated parameters in no time. The time is displayed with big digits in the main window. A multi-tabbed layout is implemented for helping you switch between the stopwatch and countdown display. Timing settings The application offers you the possibility to start, pause or reset the stopwatch. When it comes to controlling the countdown timer, you are allowed to set the time in hours, minutes, and seconds, reset the information, and start or pause the time. You may also enable or disable preset sound notifications for the countdown timer. A popup message is revealed when the time is up. We have tested WatchTheClock on Windows 8.1 Pro and noticed that it carries out a task very quickly and without errors. It is not a resource hog so you do not have to worry that it burdens the overall performance of your computer. Final words All in all, if you are on the hunt for a timer that comes packed with basic features, you can give WatchTheClock a try and see what it can do for you.
