Unigraphics NX 7 NX 7 is a
PLM system specially
designed for
manufacturing. It can
generate 3D prints,
assemble, disassemble and

virtually test a wide range of products. NX 7 uses the latest technology, a very flexible and intuitive user interface, and a strong and robust PLM core, offering a unique and powerful platform for you to design, analyze and process manufacturing data. [Read More.](#) UG NX 7.5 is the next version in Unigraphics NX family. Unigraphics NX is an established, open systems that extends the power of the 3D CAD software. It is suited for companies with diverse

needs and offers solutions for every process in the product life cycle, from conceptual design to manufacturing simulation.

The latest release of Unigraphics NX is used to create simulations and test parts for additive manufacturing. [Read More.](#)

Unigraphics NX 7.5 is a client and server for commercial use, from CAE to VCF. Unigraphics NX is a versatile PLM platform that extends the power of CAD software. With the new version, you can work

faster, both inside and outside the PLM system. In addition to features like 2D design with interactive zoom and 3D modeling, you can also create simulations and test parts for additive manufacturing, disassemble, communicate work instructions, process and analyze manufacturing data, and do more. [Read More](#). Unigraphics NX is an open system, compatible with many CAE suites and offering support for a wide range of industries. Unigraphics NX is based on

Siemens PLM Software, the world leader in PLM and industrial software, and is tailored to the specific needs of the product development process. Read More. Unigraphics NX is the most capable, versatile, and easy-to-use PLM software on the market. It is used worldwide, from CAE to VCF, to analyze, simulate, and test the widest range of parts, assemblies and products. Unigraphics NX and UGS NX are a full-featured CAE system, but it
