
The Sims 3 Rape Mod --

Erectile Dysfunction Moodlet replaces the one in Vanilla with its own 4 difficulty levels. Once the moodlet has been placed on a Sim, the mod will continuously assign it the highest difficulty of the 4.

This allows Sims who do not naturally produce erections, or have low production levels, to get an erection. Unlike the original vanilla Moodlet, this Moodlet does not have a random chance per Sim,

but instead happens every time a Sim is in a sexual situation. So once you decide to have an erection, you will get one every time you are in a sexual situation. EXPANDED EXPERIENCE SYSTEM

One of the most requested mods of all time, XXXenvision's Extended Experience System (E.E.S) will customize all of a Sim's experience points, make Sims automatically grow old (or even Die if you wish) at a rate that works with your game, and make sure all of your Sims act like Sims. It can even do that retroactively. FFAM (Friends Free Access Mod) adds the option to make a Sim boyfriend or girlfriend at the Player's choice. This system opens the door to very interesting situations. A Sim with strong friendships can get to live with another Sim without having to marry/have a wedding. The abuse mechanic is still present. A player, who is playing to much, can make the sexually object Sim have FFFAM and watch in horror as his Sim is raped. FIONA (Friend of Mine on a Needle) puts your Sims into the most erotic situations they may ever find themselves in...but then things take a twist when the relationship between the characters is strained! Since Fionas introduction, it has been possible to go through most of the romance settings with the added complication of having sex.
