the task of maintaining the present trend of music, can only be achieved by regular internal vigilance. but, these internal checks need such an intensity that the music student becomes the watchman for himself, no system of music can hope to hold fast to its own ideal without constant re-evaluation, radical re-modelling, the importance of such re-evaluation and re-modelling is not to be underestimated by any means, if serious efforts are to be made. i feel that what i have tried to do here is exactly in the true spirit of what has been done in kanitras the task of maintaining the present trend of music, can only be achieved by regular internal vigilance. i feel that what i have tried to do here is exactly in the true spirit of what has been done in kanitras 676things we need to know: death stripping for the past few seasons, the raiders offensive line has struggled to make sure that they can avoid big losses at the line of scrimmage, the raiders offensive line was responsible for a combined 13 sacks, six fumbles and many other big plays in the 2017 season. there are plenty of reasons for this, and some changes need to be made in the off-season. let's take a look at some changes the raiders need to make. first chance defensive enemy the raiders offensive line has been in a defensive free fall the past two seasons, the 2015 edition of the raiders offensive line allowed 39 sacks and only managed to protect derek carr for 31 games, the 2016 season was even worse, as the offensive line allowed 41 sacks and did not protect derek carr for the entire season. tackle bobby wagner and linebacker malcolm smith are the leaders when it comes to the raiders defense. both play the position of defensive end and can dominate a game. the problem is that they are usually matched up against starting offensive tackles, tackle desmond bryant and defensive tackle ethan cooper are capable of playing defensive end. bryant's main point of emphasis is to help create pressure on the quarterback, the raiders are really hurting without them, a quality offensive tackle that can play on the blind side and provide a smooth pass pro would be a key to the raiders offensive line in 2018. freeing up those linebackers to rush the quarterback can help open up holes for carr to run through. real linebackers the raiders have three linebackers on the depth chart that have not played a single snap in the nfl. that is a problem. adam hayward is a rookie seventh round draft pick and no one is expecting a lot from him. keith mcgill is a special teams standout and only plays on the special teams. if you are relying on these two special team players as the raiders starters, you have bigger problems. it was a pain to hear the raiders say that they were bringing in veteran players to replace mcgill and hayward.

Wao. Govindan, you have authored a wonderful website on kritis . I have been a big fan of your work since I have started collecting kritis, and now a big fan of your website. Thank you for this great job. SrinivasanRaja Thanks Govinda Sundar. I am looking for some Kirtans which were played by my Tansen's son-in-law. If you can share with me one such kirtan along with its meaning of raaga I would be very thankful for it. Please help me. Thanks Govinda Sundar, for this wonderful website and for sharing all these wonderful kritis and their interpretations. It's amazing and it's very good that you have done all these with so much difficulty in free time. I would greatly appreciate this if you could continue to add to this list (well atleast until I collect all the kritis myself). Thanks Govindan for all you've done. I am just starting out on the Kirtan path, and although there are many more kritis to be acquired, I know that once I have acquired this complete set that I'll be a well-equipped Kirtanist.
