The easiest way to get projects done with a single click is to put the right project on the right people. What if I told you that it only costs \$9.99/user/year to manage your project assets in one integrated solution? XTools Accelerator currently supports Siebel Systems (both CRM and ERP), J.D. Edwards, Peoplesoft and QuickBooks and the IT Assets module provides a flexible means to manage these assets. You can access a wide variety of information including vendors, branches, projects, costs and more. `print arcpy.GetParameterAsText(2)` The Python window should display "C:\Program Files\ArcGIS\Server10.3\System10.3.pth" in the Python output. xtools pro makes it simple to quickly add a wide range of built-in tools, and in some cases even add your own scripts. for example, the 'aerial user count' tool can be used to count the number of users within a certain radius of a specified point of interest. this can be used to provide an indication of the amount of people using a particular path for transport. adding this tool to a network dataset gives the user a visual indication of this. the xtools pro team have created an updated version of the visualisation extension for arcgis. a new interface makes it simple to create maps, charts and tables as well as the ability to add visualisations directly to arcgis online. the new version of the extension is well suited to the needs of our users. this short video shows how xtools pro works with arcgis 10.2. we have also included an example of a new viewer tool in the table viewer extension. this shows how the table viewer tool can be used to extract information from a table of data. the tool can be used to select a field, then it displays the table of data in a new window. you can copy and paste the data into a new table or into a spreadsheet.

For information about the configuration settings for XTools-Pro with ArcGIS for mobile, see Using XTools-Pro with ArcGIS for mobile. On the XTools-Pro configuration tab, for XTools-Pro Extension for ArcGIS in XTools-Pro Configuration, see XTools-Pro extension for ArcGIS in XTools-Pro configuration. For more information, see About XTools-Pro and About the Configuration Settings. Problem: A user has an older version of ArcGIS and the user wants to update to the newest version of ArcGIS and has ArcView-8 (or ArcView-7) installed as well. So the user goes to the ArcGIS manager and upgrades to the latest version of ArcGIS, but the ArcView 8 does not get uninstalled and the user does not have the option of uninstalling ArcView 8. The only

---

way to uninstall ArcView 8 is to uninstall ArcGIS 9.3, however the ArcGIS desktop is still installed in the system. What do you do? 5ec8ef588b
